

Table + Font Homework  
Assignment 4  
CS403 section 2  
Due: Oct 25, 2011

This assignment is an exercise in working with tables and fonts (NO css). The web page you'll have to reproduce is shown on the backside. Download network logos from <http://pubpages.unh.edu/~cs403s2/images/logos> (abc.gif, nbc.gif, cbs.gif and fox.gif)

The ONLY elements you need to use are listed below:

```
<html><head><body><title><table><caption><tr><th><td><font>
```

All text is set at normal size except the text above the table and the word **new**. Only the word **new** is set in a different typeface (all the other text is set in the browser's default typeface). Look at how the word **new** is displayed and choose three fonts as alternatives (you can use the font menu in Word to do this – either at your home or in one of the clusters). The only constraint is that the typeface must be all of the same kind of generic font as the one shown on the backside (*serif, sans-serif, monospace, cursive or fantasy*).

Also, near the top of each page, add the following comment, replacing my name with yours.

```
<!-- Author: Jim Weiner -->
```

I always put it right after the `<head>`, but it doesn't have to be there.

Once you are done, print out each source HTML file and hand that in. It must be a legal HTML page, so watch your start and end tags. You don't need to print the page from the browser, just the HTML source file from notepad or textedit or your choice.

TV: Tonight

## What's On Tonight

	Station	8:00 PM	8:30 PM	9:00 PM	9:30 PM	10:00 PM	10:30 PM
<b>Monday</b>		Dancing with the Stars Live				Castle <b>New</b>
