

First CSS Homework
Assignment 5
CS403 section 2
Due: Nov 1, 2011

This assignment is an exercise in working with CSS to create a presentation for a web page. For that reason, I've given you the HTML for the page and all you have to do is fill in the `<style>` element (Don't change ANYTHING inside the body). The HTML can be found at: <http://pubpages.unh.edu/~cs403s2/verizon.html> and is shown on the backside. The web page should look like as shown the below.

You will notice that most of the elements that are to be floated over to the edge are added before the text that will appear to the side of the floated element. By doing so, it's easier to control where it appears on the page. If you place in the code where you would see it on the page, it might be moved below where you want it.

Also, note that there are spans that need to be displayed as blocks. Why didn't I use `<div>` instead? Because `<p>` elements can't have blocks inside of them (or at least can't have elements which are by default blocks like `<div>`).

Also, near the top of each page, add the following comment, replacing my name with yours.

```
<!-- Author: Jim Weiner -->
```

I always put it right after the `<head>`, but it doesn't have to be there.

Once you are done, print out each source HTML file and hand that in. It must be a legal HTML page, so watch your start and end tags. You don't need to print the page from the browser, just the HTML source file from notepad or textedit or your choice.

Previous Balance	\$197.94
Payment - Thank You	-\$197.94
Balance Forward	\$0.00
Monthly Access Charges	\$179.95
Usage Charges	
Voice	\$0.00
Messaging	\$0.00
Data	\$0.00
Verizon Wireless' Surcharges and other Charges & Credits	\$6.87
Taxes, Government Surcharges & Fees	\$11.15
Total Current Charges	\$197.97

```
