

# REQUEST FOR PERMISSION TO USE

## THE PERSONAL AND RELATIONSHIPS PROFILES (PRP)

Permission to Use. The PRP is a copyright instrument. We will be pleased to give you permission to use the PRP for research purposes or for clinical trial, provided you agree to assist us in developing this instrument, as per the terms of the attached agreement. To obtain permission, please describe your intended use of the PRP briefly on the form attached.

We are pleased that you are considering using the PRP. If problems or issues come up that I can assist with, please phone or E-mail.

### TERMS OF AGREEMENT

1. This agreement is between the authors of the Personal and Relationships Profiles (PRP), hereafter referred to as the Test Authors or the Authors, and the person or persons requesting permission to use these tests, hereafter referred to as the Cooperating User or the User. The agreement covers use of the PRP for the research or clinical trial described below.

2. The Test Authors grant permission to use the PRP and to waive all royalty or permission fees solely for the research or clinical trial described below.

3. If the Cooperating User does not intend to carry out and make available to the Test Authors a psychometric analysis of the data (such as described on the next page) she/he agrees to provide the Test Authors with a copy of the data to permit the Test Authors to use it for that purpose. If the data is provided, it is further agreed that it will be the data on responses to each item in the Tests, together with as much as possible of a list of demographic information to be provided by the Test Authors.

If the User intends to carry out and provide the Test Authors with psychometric analyses, but the User's plans change and a copy of a paper or other suitable publication reporting the psychometric analysis is not sent to the Test Authors within a period of two years from the date of testing, the User agree to provide a copy of the data to the Test Authors for purposes of psychometric analysis.

4. The Test Authors agree: (A) To use the data provided by the Cooperating User for the sole purpose of psychometric analyses and not to use the data to investigate a substantive issue. (B) That the Cooperating User has the exclusive right to use the data for substantive analyses such as research on etiology, consequences, or treatment outcomes. If the Test Authors publish information based on data provided by the User signing this agreement, the Authors will acknowledge the source of the data in any publications which reports information based on the data provided by the Cooperating User.

5. In the case of students, permission to use the PRP will be granted to the advisor on behalf of the student, and must be signed by the advisor. The advisor agrees to assist the student in fulfilling this agreement, but assumes no other obligation to the Test Authors.

Please provide as much as possible of the following. I will be glad to assist you with questions or problems. E-mail is best. Please try again if I do not reply in a reasonable time. Thanks.

Murray A. Straus

\*Description of the sample, including method of recruitment and key characteristics such as age, gender, whether a treatment group of some type, etc.

\*Descriptive statistics for each scale:

Frequency distribution  
Mean, Standard Deviation, Median

The above should be provided for the total population and for important subgroups such as men and women, treatment and control group, offenders and victims, etc.

\*Alpha coefficient of reliability for each scale. Be sure to indicate the sample this applies to.

\*Results of factor analysis: the factor structure, percent of variance explained by each factor etc.

You can send a computer printout, but please be sure it is labeled to indicate the scale. If you provide separate statistics for subgroups such as men and women, please check that the group is identified and if not, write it on the output.

**IMPORTANT:** Please attach a copy of the PRP as it was printed for your use.
